

CYPPA PPG Pilot
Skill Set & Knowledge
Requirements

CYPPA PPG Pilot Skill Set & Knowledge requirements

1: Theory of Flight: Glider Aerodynamics, Lift, Drag, Thrust, Turns, Wing Inflation Theory
2: Wing: Parts, Part Functionality, Options, Certification & Maintenance Requirements, Storage & Care, Safety Precautions
3: Harness: Parts, Part Functionality, Options, Certification & Maintenance Requirements, Storage & Care, Safety Precautions
4: Wing Handling: Safely Unpacking/Removing from carrying bag, Proper & Safe Line Handling, Laying the wing for Inflation, Untangling/Preparing lines for inflation, Riser configuration for forward & reverse ground handling, Line gathering and wing lifting and carrying by the lines, folding and repacking the wing in its carriage bag,
5: Harness Use: Wearing the harness, clipping into the wing forward & Reverse, and 6 Point Checks (B.E.S.A.F.E.)
6: Ground Handling: Forward and Reverse Ground Handling Proficiency up to 10km/h Wind.
7: Glider Forward or Reverse Launch: Forward or Reverse Launch & Glider deflation proficiency wearing a harness in winds from 3km/h to 10km/h
8: Paramotor System: Paramotor components, Functionality & Geometry (Harness adjustment, rings, hang points, trust line, pilot offset, engine components, basic functionality), Safety Check List, Safe starting procedures with electric and/or pull start engines, Hang Tests and performing Adjustments, Effects of Motor on the Wing.
9: Reserve Parachutes: Types and their characteristics (Circular, Annular, Square, Pentagon, Driveable, non-Driveable) Advantages & Disadvantages, Reserve Deployment and Landing Procedure, Reserve Practise Deployments
10: Paramotor Familiarization: Wearing, Starting, Running and Stopping the Paramotor on the ground.
11: Paramotor Forward and Reverse Launch: Forward or Reverse Launch & Glider deflation training & proficiency wearing the Paramotor without the engine started
12: Meteorology: Land Breeze, Sea Breeze, Vally Breeze, Mountain Breeze, turbulence, Obstacle turbulence, Clouds & turbulence/hazards, thermals, wind shear, storms & safe Distances, safe flight conditions, personal pilot envelope.
13: Air Law: Pilot Licenses, rights & responsibilities, Local legal requirements (insurance, presentation of I.D. and License to operate Paramotor and radios if any, Right of way rules, alcohol, medication, safety of flight, ground personnel and property responsibilities, cloud, ground, property, and personnel safe distances, Civil Av. Agencies.
14: Air Space: Cypriot Airspace & Regulations knowledge, Classes B,C,G, Requirements (Visibility, 2-Way Aviation Radio & Communication, ADSb GPS, safe flight altitudes), NOTAM acquisition & comprehension, Air Communication, Airspace Requests

PRE-SOLO SKILLS CHECK: Ground Handling, Forward launch & Reverse Launch Competency, Pre Flight briefing (Weather to Fly, NOTAM) Checks, Site Assessment, and Motor Usage Competency

PRE-SOLO KNOWLEDGE TEST: Aerodynamics, Winds & Turbulence, Basic Law Requirements, Basic Air Space, Glider Components & Functionality, Effects of Motor on the Wing.

(Test Available Publicly at CYPPA and Administered By The Instructor)

First Solo Flight

Multiple circuits, 3 take-off and landings, total flight time 20/30 minutes in an open area and wind speeds less than 10mph

Flight Skills Required Before Full PPG Pilot Certification:

The Student Should Demonstrate the Ability to:

- Perform forward and Reverse Launching without assistance from an Instructor
- Perform stand up landings into wind without assistance from Instructor
- Perform low passes into wind:
 - no lower than 30ft,
 - in an open area
 - @ wind speeds less than 10mph
- Climb up to 1000ft and:
 - perform figure 8's and 'S' Turns down wind of the landing area,
 - then a spot land within 50m of a target in an open area in wind speeds less than 10mph
- Climb up to 1500ft and:
 - perform single 360's to the left and right
 - perform figure 8's and 'S' Turns down wind of the landing area,
 - then a spot land within 25m of a target in an open area in wind speeds less than 10mph
- Have a Minimum total of:
 - 15 flights as a Solo PPG Pilot
 - accumulated 3 hours flight

CYPPA PPG Pilot Knowledge Exam

Having completed the APPI PPG Pilot Practical and Theoretical training course the student needs pass the CYPPA PPG Pilot Knowledge Exam to become a Recognized CYPPA PPG Pilot.

The exam consists of:

- **40 multiple choice questions:** out of a set of a set of 400 pre-published questions
- **Relating to:** Aerodynamics, Wing/Harness/Paramotor/Reserve Parts and Functionality, Meteorology, Cyprus Air Law & Air Space.
- **Passing Grade:** 36/40

CYPPA Recognized PPG Pilot
